

Potential Warning Signs of Child Sexual Abuse:

- Sleep disturbances, increased nightmares
- Bedwetting
- Clinging - fear of being left alone
- Lack of appetite, depression
- Difficulty in walking or sitting
- Unwillingness to disrobe in the presence of others, as when getting ready for bed or changing clothes for gym class
- Fear of going home
- Running away from home
- Sexual behaviors or references that are bizarre or unusual for the child's age
- Seductiveness that is not age appropriate
- Dramatic changes in behavior or school performance
- Unusual accumulations of money
